IJ Somebody has written a book, showing how all work and study may be made play or as good as play. This FROEREL practically and successfully accomplished for very young children in his admirable system of Infant Garden. He so combined the useful with the amusing, the practical with the beautiful, and the serious with the gay, as to make physical exercise sport to the child, and mental improvement a fascination. THE CROPS IN SHELBY COUNTY .- The Sidney

Democrat Bays: We were much cheered, recently, with the

fine prospect of crops in this county. The re-port from all sections was highly flattering for an abundant yield of wheat; but we are sorry to learn that much that was supposed to be wheat proves to be cheat. The prospect for an abundant crop of oats is good; and we believe the corn generally stands well; and if the season continues favorable, we may expect a good crop. The London, O., Democrat, records the

sudden death, on Tuesday last, of Mr. Jacon WEAVER, of Pike township, Madison county. He was about sixty years of age, an old citizen universally respected, and classed among the wealthiest men of that county.

LTWe observe by the military orders of Massa chusetts that WILLIAM SCHOULER, formerly editor of the Cincinnati Gazette and Ohio State Journal, is Adjutant General of that State.

THE WEEVIL .- The Wyandot Piencer says: From reliable information obtained from difreact quarters of the county, we learn with regree that the weevil is making sad havoe in the matering wheat fields. Great complaint is also made to the cheat being in the wheat, in some fields to hat extent, as to destroy entire fields. Complaint of like nature come from other sections of the reate.

Coax and Cars.—The bagyrus Forum says the corn crop in that vicinity tooks well, and there is every prospect that it will be equal to the crop of last year. The oats crop also ises well, and the yield will be unusually large.

Or On Thursday, 1,572 hats, 1,348 coats, together with a large amount of provisions? were received at Camp Dennison. Seventyfive thousand rifle cartridges, and forty five thousand primers, and several boxes of small arms, were shipped to Bellaire from Cincinnati,

Wood's Hair Restorative.

Unlike most specifics, this is proved, by unmpeachable evidence, to possess great efficacy as a restorer of the hair to its pristine vigor. Where the head had become almost hald because of sickness, the use of this article has produced a beautiful growth of thick, glossy all classes. Its ingredients are such as to ef-fectually eradicate dandruff and other impuriies, which operate so injuriously to the hair. It also has curative properties of another de-scription. In many cases pimples and other disfigurements of the skin disappear wherever it is used. There is no hazard attaching to the trial of this remedy, and its effects can only be beneficial, as the compound, if it does not cause a manifest improvement, is incapable of doing harm, as its component elements are perfectly limoxious.— Boston Transcript, April 22, '59.

Dispatches from Washington. [World's Special.]

WASHINGTON, June 28. A spy was arrested this morning by the 21 R. I. Begiment. He had four revolvers and one pound of arsenic. When arrested, he was on the way to a spring near by, undoubtedly intending to deposit the arsenic there. It is intimated that the Cabinet had before

The Secretary of War's report will show there are 300,000 men in the field. England has shown no disposition to reply to our Government's proposition, accepting the Paris Conference on the subject of privateering, and this fact, in connection with important mili-tary movements in Canada, and Naval movements on our coasts, makes her secret designs apparent. It is understood that instructions have been forwarded to our Naval Squadron to allow no interference with our blockade under any pretext, and vigilant watch will be kept as

The hovering of a Rebel force in that neigh borhood, and the suspected presence of a large number of Virginia Rebels in the city of Balti more, induces the belief that the Rebels' programme for the introduction of a division of their army to the rear of Washington, and the insurrection of the disunionists of Baltimore, simultaneous with an engagement in the direc tion of Fairfax Court House, has not been aban

The World has a special dispatch from Fortress Monroe, stating that Col. Allen, of the New York First Regiment, was arrested to day by order of Gen. Butler. It then states that

BLOOD RENOVATOR

Is precisely what its name indicates, for, while pleasant to the taste, it is revivifying, exhilarating, invigorating and strengthening to the vital powers, and at the same time revivines, tein states, and renews the Blood in all its purity and thus at once restores and renders the system in culturable to attacks of disease. It is the only preparation ever affered to the world, so chemically and satilitatily combined as to be the most preparation ever affered to the world, so chemically and satilitatily combined as to be the most preparation ever affered to the world, so chemically and satilitatily combined as to be the most preparation ever affered to the world, so chemically and satilitatily combined as to be the most preparation excepts and the same time so perfectly states and the same time to be a deciderable of the seakest stomach, and total up the distribution in the same time it is composed entirely of vegetables, yet so combined as to produce the most the rough tonic effect, without producing any injurious consequences. Euclous the rest of the same time is the sea that debitity follows all attacks of disease, and proceeds and indeed lays the system open to the insidious attacks of many of the most fatal, such for example, as the following: Consumption, Indigestion, Dyspensia, Loss of Appetite, Faintness Nervous Irritability, Neuralgis Palpitationol the Heart, Melancholy, Night Sweats, Languor, Giddiness, Retention of, as well as Palpitationol the Heart, Melancholy, Night Sweats, Languor, Giddiness, Retention of, as well as Palpitationol the theory of the same and the core as the sun to debility. We will also say the traveler exposed to epidemics, change of climate and water, will find it a pleasant, sale and sure remedy, and none should ever travel without. Reader, ity it, for we assure you you will find in it a riend indeed, as well as a friend in need.
